

COLPOSCOPY BIOPSY AFTER CARE

Patient information Leaflet

November 2017

Biopsy Aftercare

Small samples of tissue have been taken from the neck of the womb to be examined in the laboratory (biopsy).

You will usually have some bleeding, changing to a brownish discharge, for one to two weeks.

In order to minimise the risk of bleeding or any infection, it is advisable not to have sexual intercourse or use tampons for two weeks. Use sanitary towels or panty liners instead.

We advise using a shower/full body wash for two weeks instead of a bath and no swimming or exercise for two weeks.

We will write to you with the results of your biopsy in 3-4 weeks. If you require any treatment you will receive an appointment through the post.

**If you have any problems or wish to discuss anything further please do not hesitate to contact the clinic on:
0161 922 6168 to speak to a Colposcopy nurse for advice.
(Colposcopy Secretary 0161 922 6167).**
