

Hand Hygiene Report (July 2019)

- The Hand Hygiene Audit has now been updated to ensure that we are able to demonstrate measurement of compliance with the World Health Organisation derived “Five Moments for Hand Hygiene”. This is important as it evaluates the efficacy of hand decontamination at the point of care and at the 5 most significant opportunities to prevent transmission of health care infection.
- We have now revised the audit to concentrate fully on observation of practice, in addition to staff complying with the Bare Below the Elbows dress code.
- Non-receipt of an audit should not reflect on the individual area as the audits are allocated to Matrons based on a monthly schedule.
- The number of areas audited is 33
- A recent addition to the audit process is that any area not achieving a compliance rate of 97% or above will be required to complete a re-audit across the following seven days.

Hand Hygiene Audit Results – July 2019

- Hand Hygiene Observational Audit: 96%
- Bare Below the Elbows Audit: 99%
- Percentage of Wards Audited: 100%
