

Patient Information Leaflet

THE TRANSVAGINAL ULTRASOUND SCAN

A transvaginal (internal) scan MAY be performed during your visit to obtain further images of the pelvic area and can be performed even if you are menstruating – if you use tampons you will be asked to remove it prior to the examination.

A transvaginal scan is a gentle examination which is performed by an Advanced Practitioner in Ultrasound. A small ultrasound probe covered in a protective sheath similar to a condom and lubricated with gel is inserted a little way into the vagina.

*If you are allergic to latex (condoms, rubber gloves etc.) please inform the Advanced Practitioner in Ultrasound BEFORE the examination.

In certain circumstances a Transvaginal scan is not normally performed (e.g. if you have NEVER had sexual intercourse, or for personal beliefs or other circumstances).

If you have any concerns regarding the ultrasound examination you should discuss them with our Booking Team on 0161 922 6426 (direct line).

* PLEASE FILL IN THE FORM BELOW WHEN YOU HAVE READ THE INFORMATION AND BRING IT WITH YOU WHEN YOU ATTEND FOR YOUR APPOINTMENT.

.....
