

Pre-operative information for urgent gynaecology patients to come in to the Day Surgery Unit

Patient information leaflet

October 2019

Introduction

This booklet contains information which will help you prepare for your forthcoming surgery. Please ensure that you read the information carefully.

As you are having your procedure under General Anaesthesia you **MUST**:

- Be collected from the Day Surgery Unit by a responsible adult.
- Go home by taxi or car. You should not travel home by public transport as you will be recovering from the effects of your operation and anaesthetic.
- Arrange for a responsible adult to remain at home with you for the first 24 hours after your operation.
- Take the day after your operation off work.
- Ensure you have a responsible adult to care for your dependents for 24 hours.

Will I need to stay in hospital overnight?

An overnight stay within the day-case unit may be required if it is too late in the evening for you to go home or you have no one to take you home or stay with you overnight.

You will be informed if it is expected that you require an overnight stay. Where it is decided that you will be kept in overnight, your relatives are welcome to visit from 6.30pm. Unless you need to be seen by the medical team the following morning, we ask patients to be collected early (7am) the next morning – if this is not possible then you may be asked to wait in the discharge area until you are picked up.

Please report to the Reception of the Day Surgery Unit located on the 1st floor of the Hartshead South building at 7.30 am.

Please bring in with you:

- A dressing gown and slippers.
- A book/magazine/something to help to pass the time
- A list of your medication and bring any inhalers, GTN spray or Insulin.

Please **do not** bring any valuables with you, as we have no lockable storage.

Please **remove all** nail varnish, gel/acrylic nails, make up, false eyelashes and any body piercings/jewellery.

Please do not take alcohol the evening before or smoke on the day. **Your procedure may be cancelled if you have had alcohol or smoked (including E Cigs) on the day of your surgery.**

Please be advised that whilst relatives/friends will be able to stay with you in the waiting room, **relatives are not usually able to accompany you to the ward area.** Please speak to the nurse in charge if you feel you need a supporting person to accompany you.

Your escort can take the units contact telephone number and an approximate discharge time from the nursing staff as to when to phone later for information.

We have asked you to come to hospital at a particular time in order to prepare you for your operation. However unfortunately things change, eg: an emergency may take priority on the operating list – so we cannot guarantee the exact time of your operation. We will try to keep you informed if there are any delays. Be prepared to be on the unit for several hours.

Fasting Instructions

- **You MUST NOT have any food after 2.30am** (this includes chewing gum and boiled sweets)
- **You may have clear non-fizzy drinks up to 6:30am** on the morning of your operation/procedure. This includes water, squash or clear fluid without bits, black tea/coffee – **NO** milk or milk products are allowed.
- Please ensure you **take your medications before 6.30am**.

You should have nothing by mouth after 6.30am on the day of procedure.

Please note: If you require simple painkillers following your surgery (Paracetamol, Ibuprofen, CoCodamol 8/500), the hospital will not supply these. These medications can be purchased over the counter and you must ensure you have a supply of painkillers at home before coming in for your surgery.

If at any point you have any questions regarding your waiting time, please ask a member of the nursing team, who will find out the information for you.

Your surgeon or one of his/her team will explain the proposed procedure, and associated risks/complications. If not already completed in clinic, you will then be asked to sign a consent form confirming that you are happy to proceed. You will also meet your anaesthetist who will discuss the anaesthetic, the drugs and pain relief they intend to use.

After the operation

Immediately after your operation you will be taken to the recovery room. Following initial observation you will be transferred back to the Day Surgery Unit.

The nurses will assess your progress regularly, ensuring that you have eaten, are drinking and have passed urine. When you are ready to go home (this will be at least 2 hours after return to the unit), you will be given post-operative advice and information specific to your procedure along with contact telephone numbers in case you have any concerns once you get home. **The Unit operates Nurse Led Discharge, as such you will not usually be seen by the Surgeons before going home.**

Once you are at home

For the first 24 hours at home, **DO NOT**:

- Drive or operate machinery
- Look after small children,
- Use a cooker,
- Ride a bicycle,
- Sign any legal documents
- Engage in any activity requiring skill or judgement.
- Take sleeping tablets
- Drink alcohol.

If you have any questions you want to ask, please feel free to ring the Day Surgery Unit on 0161 922 4917 or you can use this space below to remind you

If you have a visual impairment this leaflet can be made available in bigger print or on audiotape. If you require either of these options please contact the Patient Information Centre on 0161 922 5332

If you require an interpreter, please ask an appropriate person to contact our central booking office between Monday to Friday 8am to 5pm on 0161 922 6991 to arrange this for you.
